We have group of professionals which are highly expertise in the financial markets, quipped with combined experiences of over 8 decades which carefully conduct market studies for trading purposes in other to achieve success trading in the market.

Some Percentages of our funds are traded in the world biggest financial liquid market averaging \$5.3 Trillion dollars daily, that is why at aline-impact.ltd, we find Forex trading an area that cannot be over-emphasized.

Our **Services**

aline-impact.ltd is an absolutely unique and high-tech company covering several most profitable and relevant business lines of various profitability (Mining, Trading, Agriculture, Real Estate, Gold) at once.

Crypto Mining

It wasn't until a few years later when more and more cryptocurrencies were created that people started trading them. The idea is really simple. You trade one cryptocurrency for another, with the hope that the coin you buy increases in value. While cryptocurrencies are not accepted as legal tender in the vast majority of countries around the world yet, their potential to change the wider financial landscape has made them impossible to ignore and has opened up investment and trading opportunities.

The Blockchain technology that drives most cryptocurrencies also has wider implications for everything from client-server models to food supply chains and enhanced cyber security protocols.

Real Estate

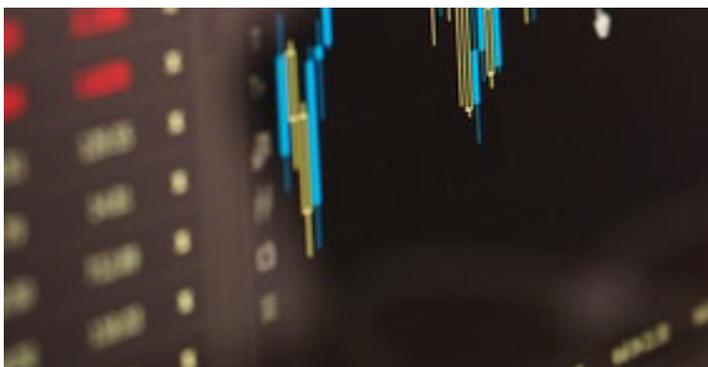

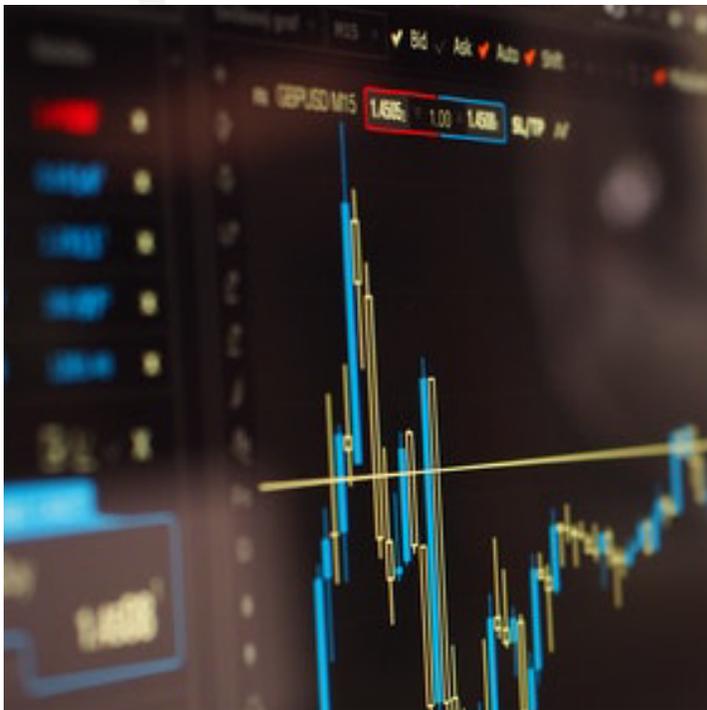

Real estate is an asset form with liquidity relative to other investments, it is also capital intensive and is highly cash flow dependent. If these factors are not well understood and managed by the investor, real estate becomes a risky investment.

This is why investing with aline-impact.ltd is the best option, we don't only make real estate investment cost effective, every risk involved is also curtailed leaving you with guaranteed profits.

Trading

Forex trading is considered as one of the largest and most liquid markets in the world. According to a recent triennial report from the Bank for International Settlements (a global bank for national central banks), the dollar amount of daily transactions in the Forex market is around USD 5 trillion and \$1.5 trillion of this amount comes from spot trading. This volatility can be difficult because of the limited decision time, that is why dedicated investor teams tend to be more successful than “side traders”.

Agriculture

There are many reasons to invest in agriculture: it is a low-risk investment that keeps pace with inflation and increases in value over the long-term, it is a tangible asset that provides benefit to the community, and it can diversify a portfolio.

Investors can make money from cash flow from crops that are harvested. Investing in agriculture may not provide immediate returns. but over the long-term, it can pay off greatly

Gold

Of all the precious metals, gold is the most popular as an investment. Investors generally buy gold as a way of diversifying risk, especially through the use of futures contracts and derivatives.

The gold market is subject to speculation and volatility as are other markets. Compared to other precious metals used for investment, gold has been the most effective safe haven across a number of countries.

Bitcoin Escrow Service

So how does the escrow work? When a trade starts, the seller's crypto is automatically transferred into our secure escrow.

How our escrow helps cryptocurrency buyers: If you as a buyer make the payment but the seller refuses to release your crypto, the secure escrow serves as a guarantee. The seller's cryptocurrency will stay in escrow until our moderators step in to investigate the situation and award the cryptocurrency to the deserving party.

How our escrow helps cryptocurrency sellers: Sometimes a buyer may not be able to finalize the payment for the cryptocurrency. If you're the seller in this case, then your cryptocurrency is safely returned back to your wallet. Once the payment is made and confirmed, the seller can release cryptocurrency from escrow to the buyer, and this will mark the completion of the trade.
